

ROKER flow

THE MOST COMPREHENSIVE ALL-ROUNDER

VERSATILE

Enhances growth and photosynthesis

Promotes roots and plant vigour

Immediate energy and nutrition

Helps overcome stress

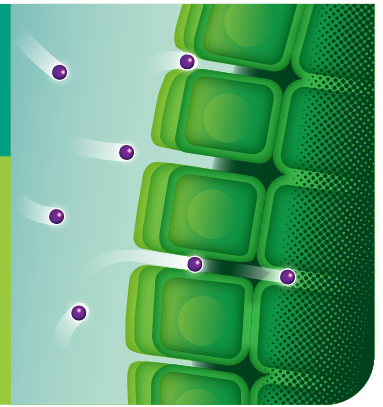

Improved balance and performance

BIoACTIVE LINE

An exclusive formulation developed by Seipasa, based on **BIACTIVE-NATURAL TECHNOLOGY**

- » Optimal dissolving.
- » Reduction of the active molecule size, facilitating its absorption by plants.
- » Liquid, easy to handle and safe for the person applying it.

How it works

- Helps increase the efficacy of photosynthetic pathways.
- Promotes correct cellular osmosis in plants.
- Boosts the formation of plant tissue.

Benefits

- Constant, sustained energy input for crops.
- Encourages proper assimilation of nutrients by plant.
- Improved general crop performance.
- Prevention and recovery from situations of stress.
- Root growth promoter.
- Orderly, balanced plant growth.

Crops	Doses		Recommendations
	Foliar application	Soil application	
Stone and pome fruit trees Nuts and seeds Vines and table grapes Citrus fruit Olive trees Tropical crops	200-500 ml/hl 2-5 L/ha	5-10 L/ha	Apply 2 to 5 applications from the time of transplanting or beginning of sprouting until the formation of fruit, seed or harvestable part. Recommended at times of high energy demand and in situations of abiotic stress to ensure the most important processes of the crop's production cycle.
Horticultural crops and berries Industrial and extensive crops Ornamentals	200-400 ml/hl 2-4 L/ha	3-8 L/ha
